31 to classroom instruction in a career and technical education  
32 subject area offered by a school district or accredited  
33 nonpublic school.

34 EXPLANATION

35 The inclusion of this explanation does not constitute agreement with

1           the explanation's substance by the members of the general assembly.

2       This bill provides another option by which an instructor may  
3 qualify to teach at a community college in the subject area  
4 of career and technical education (CTE). The bill permits an  
5 instructor to teach CTE classes at a community college if the  
6 instructor possesses an associate degree in the CTE field of  
7 instruction in which the person is teaching, if such degree  
8 is considered terminal for that field of instruction, and the  
9 instructor has at least 3,000 hours of recent and relevant work  
10 experience in the area in which the instructor teaches classes.

11       Currently, an instructor must have a baccalaureate or  
12 graduate degree relating to the area in which the instructor is  
13 teaching classes or, if the instructor possesses less than a  
14 baccalaureate degree, must have special training and at least  
15 6,000 hours of recent and relevant work experience in the area  
16 in which the instructor teaches classes. In the latter case,  
17 if the instructor is a licensed practitioner who holds a career  
18 and technical endorsement under Code chapter 272, classroom  
19 instruction can be used to meet the requirement relating to  
20 relevant work experience, and the bill applies this language to  
21 the new option as well.
